## 1.4 Product Information

### 1.4.1 Technical Description

The Monica Novii POD is an intrapartum Maternal/Fetal Monitor that non-invasively measures and displays fetal heart rate (FHR), uterine activity (UA) and maternal heart rate (MHR).

The Novii POD acquires and displays the FHR tracing from abdominal surface electrodes that pick up the fetal ECG (fECG) signal. Using the same surface electrodes, the POD also acquires and displays the UA tracing from the uterine electromyography (EMG) signal and the MHR tracing from the maternal ECG signal (mECG).

The POD is indicated for use on women who are at >36 completed weeks, in labor, with singleton pregnancies, using surface electrodes on the maternal abdomen.

The Novii Patch is an accessory to the Novii POD that connects directly to the Novii POD and contains the surface electrodes that attach to the abdomen. The Novii Interface is an accessory to the Novii POD which provides a means of interfacing the wireless output of the Novii POD to the transducer inputs of a Maternal/Fetal Monitor.

The Novii Interface enables signals collected by the Novii POD to be printed and displayed on a Maternal/Fetal Monitor and sent on to a central network, if connected.

## 1.5 Deviations from the Standard

No deviations from the applicable test standard were made during testing.

## 2 Test Details

### 2.1 RF Exposure E and H Fields

#### 2.1.1 Specification Reference

FCC Part 1, Clause 1.1310

#### 2.1.2 Equipment Under Test and Modification State

Interface, S/N: TA1772 - Modification State 0

Pod, S/N: AA5425 - Modification State 0

Pod, S/N: AA5431 - Modification State 0

#### 2.1.3 Date of Test

11-December-2017

#### 2.1.4 Test Method

Measurements were made from all sides and the top of the primary/client pair, with the 10 cm measured from the centre of the probe(s) to the edge of the device.

Two Pods were placed on the Interface's charging plate to maximise the output of the wireless charger.

Emissions between 100 kHz to 300 kHz should be assessed versus the limits at 300 kHz in Table 1 of Section 1.1310: 614 V/m and 1.63 A/m.

#### 2.1.5 Environmental Conditions

Ambient Temperature 20.1 °C

Relative Humidity 36 %
